# AVAILABLE COLOR MATCHES

Hi-Tech Systems has taken the unique steps to create direct color matches to alternative products as opposed to offering a Hi-Tech standard color as an approximate match. This will ensure the closest possible match to the color of an alternative product. When ordering a color matched tint pack simply apply the include color prefix to identify the company along with the color name. The below is a list of colors that are currently matched. If the color you are looking for is not listed you will need to submit the color for a custom color match.
